COWRA HIGH SCHOOL

Cowra High School Policy for Assessment in Year 9 and 10

Introduction.

Dear Student,

Cowra High School is proud of its high academic achievement and we look forward to working with each of you to achieve your potential in Stage 5.

It is very important that you read this book carefully. It contains the guidelines and expectations for your school based assessment tasks. The tasks will help form your final assessment for your Record of School Achievement (RoSA).

The staff at Cowra High School are here to support you. Please seek assistance when you need it.

My best wishes for the coming year. Work hard and achieve your potential. Remember our school vision *"Through quality teaching, Cowra High School seeks to prepare students to fulfil their potential and pursue excellence in all fields of endeavour. We value culture and positive self-worth to empower students to lead purposeful lives, contributing to local and global communities to succeed in a dynamic world. We strive to provide a holistic and inclusive education for all learners, fostering resilience and creating curious, confident, respectful, responsible life-long learners"*.

Regards

What is ROSA?

The Record of Student Achievement (or RoSA) is the formal credential awarded to eligible students who choose to leave school prior to receiving their HSC. Students will also be able to view and download a transcript of their achievements when applying for jobs or further education or training. To be eligible for a RoSA, students will need to have completed the mandatory requirements for Stage 5 (Years 9 and 10)

What is the Record of Student Achievement (or RoSA)

The RoSA is an electronic record of student achievements and includes:

- Grades for all the courses a student has completed up until the point they leave school – including those completed in Year 10, Year 11 or even Year 12
- Vocational courses and students' vocational experiences
- Citizenship and leadership achievements such as First Aid courses, community languages courses and Duke of Edinburgh awards
- Results from optional on-line literacy and numeracy tests, with particular emphasis on work readiness, that students will be able to undertake twice a year

There is no external examinations for the RoSA. All assessment is internal and based on work completed in Stage 5 (Years 9 and 10). Students will be required to submit assessment tasks as delivered by their schools. Teachers will then use marks from those assessments to allocate a grade for each student at the end of the course. Teachers will submit those grades to the NSW Educational Standards Authority (ESA) for inclusion on the RoSA.

Student grades are based on the assessment tasks outlined in this document. These grades are based on the A - E Grade Scale and Course Performance Descriptors developed by the ESA. Grades are given for individual achievement and are determined by the depth of knowledge and understanding and the range of skills that students demonstrate.

A	The student has an extensive knowledge and understanding of the content and can readily apply this knowledge. In addition, the student has achieved a very high level of competence in the processes and skills and can apply these skills to new situations.
B	The student has a thorough knowledge and understanding of the content and a high level of competence in the processes and skills. In addition, the student is able to apply this knowledge and these skills to most situations.
C	The student has a sound knowledge and understanding of the main areas of content and has achieved an adequate level of competence in the processes and skills.
D	The student has a basic knowledge and understanding of the content and has achieved a limited level of competence in the processes and skills.
E	The student has an elementary knowledge and understanding in few areas of the content and has achieved very limited competence in some of the processes and skills.

What are the Requirements for the award of the RoSA?

To meet the requirements of the RoSA in Stage 5 (Years 9 and 10), students are required to study both core courses and elective courses

Core Courses: All students must undertake

- English
- Mathematics
- Science
- Human Society and its Environment – History and Geography
- Personal Development, Health and Physical Education.

Elective Courses: All Students must undertake at least 400 hours elective courses (studied in both Years 9 and 10).

Work Requirements

A student will be considered to have satisfactorily completed a course if, in the **Principal's view**, there is sufficient evidence that the student has:

- (a) **followed** the course developed or endorsed by the Board; and
- (b) **applied** themselves with diligence and sustained effort to the set tasks and experiences provided in the course by the school; and
- (c) **achieved** some or all of the course outcomes.

In all courses, students are required to

- Submit all assessment tasks by the **due date**
- Make a genuine attempt to complete course work – **in class and homework activities**;
- **Attend** regularly (a minimum of 85% attendance is expected)

Where a student is not meeting these requirements in a particular course, a warning letter will be sent home informing parents that the student is at risk of receiving an N determination.

If the student has not met all mandatory requirements by the end of Year 10, they will not be eligible to receive a RoSA in that year and may not be able to progress to Year 11 and 12.

Cowra High School Assessment Program

The assessment requirements for each course are set out in the course syllabus. Cowra High School has developed an assessment program for each course offered, following these requirements. These programs are set out in this booklet and are designed to assist teachers to determine the final RoSA grade.

Student Responsibilities

- Attempt **all work** and submit work to an **acceptable standard** and in an appropriate format
- Submit assessment tasks on the **due date**, directly to the teacher, and sign a sheet of receipt, both when the task is distributed and when it is submitted. Under no circumstances should an assessment task be left on a teacher's desk in their staffroom or classroom
- Be aware of the procedures to be followed if absent when a task is to be submitted, or completed in class, or when an extension is sought. (See Below)
- If absent from lesson(s) **actively pursue** whether an assessment task has been issued.
- Satisfactorily **explain** all full and partial **absences** from school and class.
- Present their **own work** – copying and pasting or writing someone else's work (without acknowledging the source) is plagiarism and will result in a zero mark
- Acknowledge all **sources** of information used, e.g. bibliographies

(i) Illness / Misadventure and consideration of Absence Applications by Students

Students who feel that their performance on the task has been affected by factors outside their control may wish to apply for special consideration. Students must formally apply by completing the Illness/Misadventure and/or Extension Application Form. The application form is available from a Deputy Principal. In the case of illness, a Doctors Certificate must accompany the application for illness and/or extension.

Misadventure refers to any **valid** reason, other than illness, for not completing, submitting or being present for an assessment task. **Documentary evidence** should accompany the application for misadventure and/or extension.

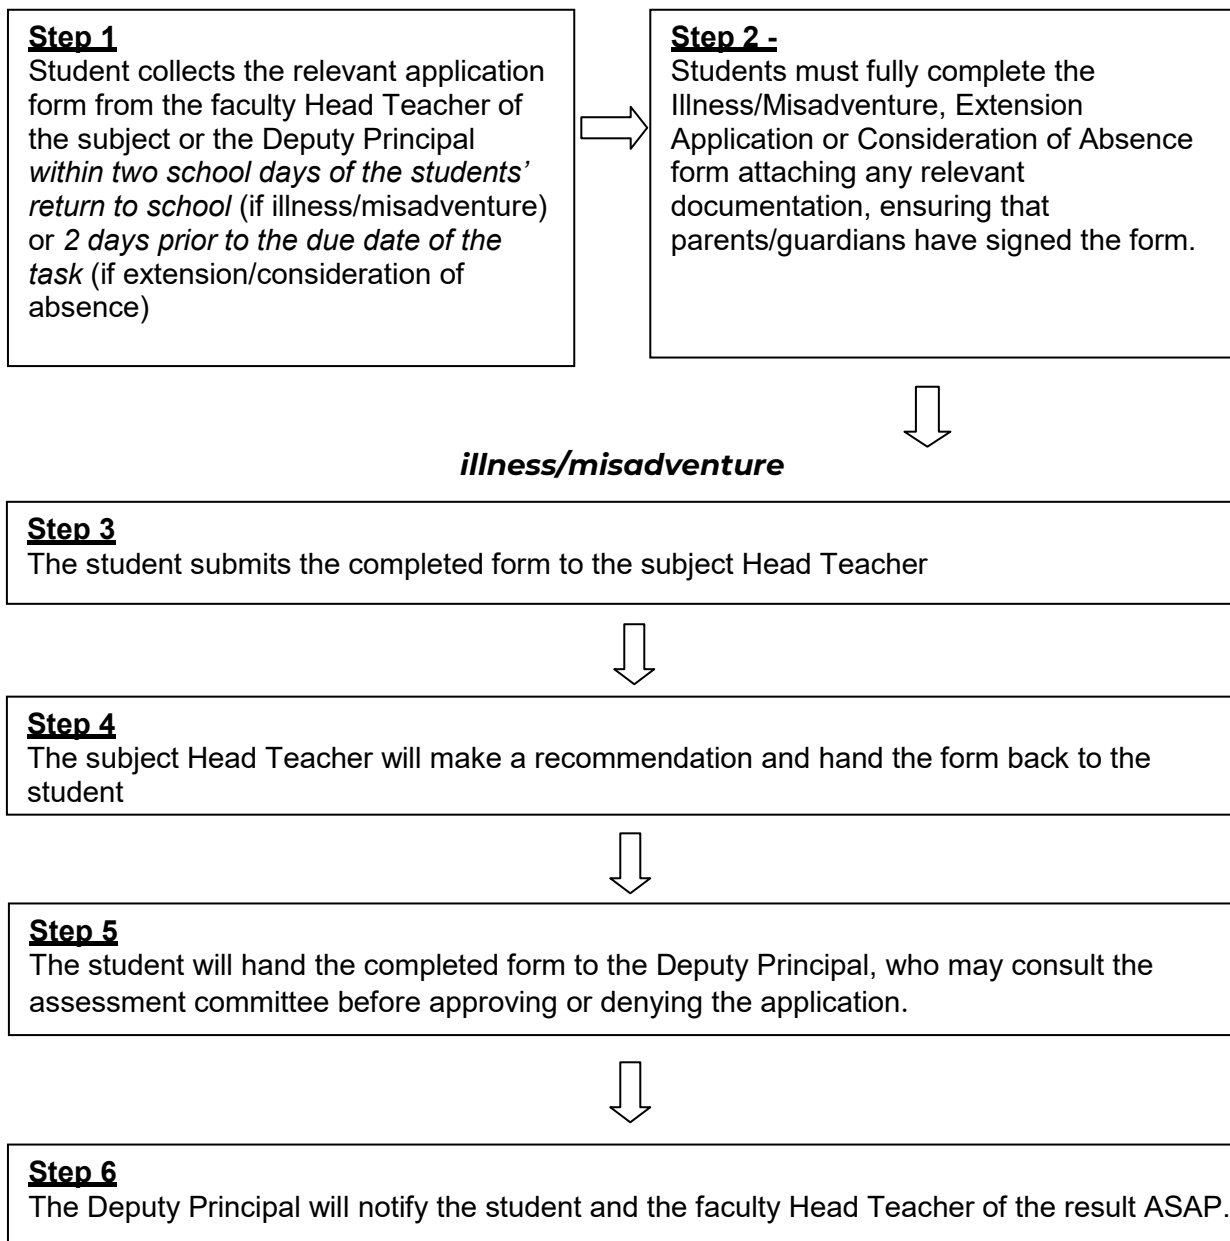

Consideration of absence can be sought for legitimate absences e.g. school sporting events that clash with in-class tests, important events, such as funerals.

It is important to note that:

- Students must pursue the illness/misadventure process. There is no onus on the class teacher to instigate this process.
- Work submitted late **without** approval for illness/misadventure, extension of time, or consideration of absence will be marked, though a **10% deduction penalty** per day will apply for each day that the task is late. If, after 5 days (from the original due date), the task has still not been submitted, a mark of **zero** will be awarded, and
- A NES A **N determination warning letter** will be sent to the student's home address (See appendix D).

If the illness/misadventure application is approved, the student will complete the set task or an alternate task as soon as can be arranged, preferably on the next school day, or, in exceptional circumstances, an estimate will be used based on assessment evidence.

Process for seeking extension, consideration of absence or

If the illness/misadventure, consideration of absence or extension application is approved, the student will complete the set task or an alternate task as soon as can be arranged, preferably on the next school day, or, an estimate will be used based on assessment evidence, or the school will use a mark based on a substitute task. Any substitute task should:

- Be based on the same components or outcomes as the original task,
- Test or measure the same knowledge or skills as the original task,
- As far as possible, be of comparable standard to the original task,
- Be assessed in the same manner as the original task.

Practical tasks cannot usually be made up due to the nature of the tasks except in exceptional circumstances.

Invalid reasons for illness/ misadventure will result in a mark of zero '0' for that task.

(ii) Extension of Time Requested by Students

Notice of **foreseeable absences** must be brought to the attention of the class teacher and subject Head Teacher so that negotiations can be made to set alternate dates/tasks.

Students are permitted to submit tasks prior to the due date in these situations where this has been negotiated with the class teacher and Head Teacher. It is the student's responsibility to plan around foreseeable absences.

Students who cannot submit a task on or by the due date, for reasons beyond their control, can make a written application at least **one week** prior to the original due date on the Extension of Time (Appendix C) or Consideration of Absence form (Appendix A)

(iii) Computer Failures

Technical failures related to computing equipment **will not** constitute sufficient grounds for the granting of an extension. Students are expected to follow responsible practices in relation to the use of technologies, including the maintenance of reliable and up to date back up copies, allowing sufficient time to deal with potential technical failures and the retention of printed back-up copies. Where a computer/printer malfunction occurs the backup copy can be submitted. Preparation notes may be submitted to demonstrate student achievements, in the event of computer failure/malfunction.

(iv) Submission of non-written tasks

Students must ensure that any disks, films or tapes are operable on standard school equipment. This must be checked **before** submission.

(v) Plagiarism and Internet Cheating

Where there is clear evidence of plagiarism in assessment tasks, students will receive a zero (0) for that task. Where direct quotes are used, these must be acknowledged by the appropriate use of quotation marks.

Students who simply copy material from the Internet and present material as their own will receive zero (0) for that task.

If a student fails to complete assessment tasks which contribute more than (in excess of) 50% of the available mark in any Board determined course, he/she will not have satisfactorily studied the course. In such circumstances an 'N' determination may be submitted for the course.

Teacher Responsibilities

Teachers must:

- Follow the Assessment Schedule for their subject
- Provide a sheet of receipt for the student to sign both when the task is distributed and when it is submitted.
- Give students **at least TWO WEEKS** written notice for each assessment task
- Ensure that absent students receive the information the next time the student attends the class.
- Negotiate the necessary changes with the class when an assessment task must be rescheduled due to unforeseen circumstances. The class will be informed in writing of any change. A minimum of two weeks' notice will be given in writing if the date of a task is to be varied.
- Ensure that the task is published on the school website for students and parents to access.

Every assessment task distributed to students will include the following information:

- Specific Question/s to answer
- Marking Criteria
- Outcomes being assessed
- Weighting of the task
- Date Due
- Date Distributed

Assessment, School Reviews and Appeals to the Board

There is no provision for a review of marks awarded for assessment tasks. Reviews are limited to the assessment process.

In the event of an appeal or review, the only matters which the NESAs will consider are whether or not:

- a) The school's assessment program conforms to the NESAs requirements.

AND/OR

- b) The procedures used by the school for determining the final assessment mark conform to its stated assessment program.

AND/OR

- c) There are computational or other clerical errors in the determination of the assessment mark.

ASSESSMENT OVERVIEW

Aboriginal Studies Assessment Schedule

Course Description					
Stage 5 Aboriginal Studies provides students with the opportunity to gain knowledge and understanding of Aboriginal Peoples of Australia, their cultures and lifestyles. It is designed to be inclusive of all students in NSW schools and is of value to both Aboriginal and non-Aboriginal students. This will enable students to be active and informed advocates for a just and inclusive society.

Assessment Syllabus Outcomes

CS5-1 identifies the characteristics of a child at each stage of growth and development

CS5-2 describes the factors that affect the health and wellbeing of the child

CS5-3 analyses the evolution of childhood experiences and parenting roles over time

CS5-4 plans and implements engaging activities when educating and caring for young children within a safe environment

CS5-5 evaluates strategies that promote the growth and development of children

CS5-6 describes a range of parenting practices for optimal growth and development

CS5-7 discusses the importance of positive relationships for the growth and development of children

CS5-8 evaluates the role of community resources that promote and support the wellbeing of children and families

CS5-9 analyses the interrelated factors that contribute to creating a supportive environment for optimal child development and wellbeing

CS5-10 demonstrates a capacity to care for children in a positive manner in a variety of settings and contexts

CS5-11 analyses and compares information from a variety of sources to develop an understanding of child growth and development

CS5-12 applies evaluation techniques when creating, discussing and assessing information related to child growth and development

Child Studies Scope and Sequence

The following scope and sequence includes:

Module 1: Preparing for Parenthood: Planning to have a family, Physical, social and emotional changes during pregnancy, Parenting styles.

Module 5: Growth and Development: Child growth and development, Influences on child growth and development.

Module 8: Food and Nutrition in Childhood: Nutrition needs through the early years, Issues in food and nutrition, Food for special occasions.

Module 3: Family Interactions: Family roles and responsibilities, Relationships in families.

Commerce Assessment Schedule

Course Overview:					
Commerce provides the knowledge, understanding, skills and values that form the foundation on which young people make sound decisions about consumer, financial, economic, business, legal, political and employment issues. It develops in students an understanding of commercial and legal processes and competencies for personal consumer and financial management. Through the study of Commerce students develop consumer and financial literacy which enables them to participate in the financial system in an informed way.

Commerce Syllabus Outcomes:

- applies consumer, financial, economic, business, legal, political and employment concepts and terminology in a variety of contexts COM5-1
- analyses the rights and responsibilities of individuals in a range of consumer, financial, economic, business, legal, political and employment contexts COM5-2
- examines the role of law in society COM5-3
- analyses key factors affecting decisions COM5-4
- evaluates options for solving problems and issues COM5-5
- develops and implements plans designed to achieve goals COM5-6
- researches and assesses information using a variety of sources COM5-7
- explains information using a variety of forms COM5-8
- works independently and collaboratively to meet individual and collective goals within specified timeframes COM5-9

Commerce Scope and Sequence

Both core topics must be studied. Between two and four option topics must be studied.

- Employment and Work Futures – Core Topic – 20-25 indicative hours
- Law, Society and Political Involvement – Core Topic – 20-25 indicative hours
- Purchasing a Car (School Developed Option) – Option Topic – 15-25 indicative hours
- Travel – Option Topic – 15-25 indicative hours
- Towards Independence – Option Topic – 15-25 indicative hours

Dance Scope and Sequence

The following scope and sequence covers the following content:

The Dance Syllabus is for students to experience, understand, value and enjoy dance as an artform through the interrelated study of the performance, composition and appreciation of dance.

Students will develop knowledge, understanding and skills about dance as an artform through:

- * Dance performance as a means of developing dance technique and performance quality to communicate ideas
- * Dance composition as a means of creating and structuring movement to express and communicate ideas
- * Dance appreciation as a means of describing and analysing dance as an expression of ideas within a social, cultural or historical context.

Elective History Assessment Schedule

Course Description

The study of History Elective enables students to investigate the actions, motives and lifestyles of people over time, from individuals and family members, to local communities, expanding to national and world history contexts. It introduces the idea that the past contains many stories and that there is never only one uncontested version. There are many differing perspectives within a nation's history, and historians may interpret events differently depending on their point of view and the sources they have used. The study of History develops an appreciation for and an understanding of civics and citizenship. It also provides broader insights into the historical experiences of different cultural groups within our society – for example, Aboriginal and Torres Strait Islander Peoples, migrants and women. History encourages students to develop an understanding of significant historical concepts such as continuity and change, cause and effect, significance and contestability.

Stage 5 Outcomes:

HTE5-1 applies an understanding of history, heritage, archaeology and the methods of historical inquiry.

HTE5-2 examines the ways in which historical meanings can be constructed through a range of media.

HTE5-3 sequences major historical events or heritage features, to show an understanding of continuity, change and causation.

HTE5-4 explains the importance of key features of past societies or periods, including groups and personalities.

HTE5-5 evaluates the contribution of cultural groups, sites and/or family to our shared heritage.

HTE5-6 identifies and evaluates the usefulness of historical sources in an historical inquiry process.

HTE5-7 explains different contexts, perspectives and interpretations of the past.

HTE5-8 selects and analyses a range of historical sources to locate information relevant to an historical inquiry.

HTE5-9 applies a range of relevant historical terms and concepts when communicating an understanding of the past.

HTE5-10 selects and uses appropriate forms to communicate effectively about the past for different audiences.

Elective History Scope and Sequence

The following scope and sequence covers the following content:

- History, Heritage and Archaeology: Troy (12.5 hours); The Seven Wonders (12.5 hours)

Assessment Syllabus Outcome

5.1.1 develops ideas and explores solutions to STEM based problems

5.1.2 demonstrated initiative, entrepreneurship, resilience and cognitive flexibility through the completion of practical STEM based activities

5.2.1 describe how scientific and mechanical concepts relate to technological and engineering practice

5.2.2 applies cognitive processes to address real world STEM based problems in a variety of contexts

5.3.1 applies a knowledge and understanding of STEM principles and processes

5.3.2 identifies and uses a range of technologies in the development of solutions to STEM based problems

5.4.1 plans and manages projects using an iterative and collaborative design process

5.4.2 develops skills in using mathematical, scientific and graphical methods whilst working as a team

5.5.1 applies a range of communication techniques in the presentation of research and design solutions

5.5.2 critically evaluates innovative, enterprising and creative solutions

5.6.1 selects and uses appropriate problem solving and decision making techniques in a range of STEM contexts

5.6.2 will work individually or in teams to solve problems in STEM contexts

5.7.1 demonstrates an appreciation of the value of STEM in the world in which they live

5.8.1 understands the importance of working collaboratively, cooperatively and respectfully in the completion of STEM activities

Food Technology - Year 9 - Assessment Schedule

Course Overview: Through the study of Food Technology, students are aware of the development of technology and its impact on the individual, society, the environment and the food industry. Students have understanding, knowledge and skills of a range of processes, resources and technologies, including computer software, appropriate to the planning, preparation, manufacture, experimentation and plating of food. Students have a body of knowledge, skills, values and attitudes and apply these in a practical manner. Students express ideas and opinions, experiment and test ideas and demonstrate responsibility in decision-making in a safe learning environment. Students reflect on and evaluate decisions made in relation to solutions for specific purposes with regard to food at a personal level, and also consider the social implications of these in a variety of settings.

Syllabus Outcomes

- › demonstrates hygienic handling of food to ensure a safe and appealing product FT5-1
- › identifies, assesses and manages the risks of injury and WHS issues associated with the handling of food FT5-2
- › describes the physical and chemical properties of a variety of foods FT5-3
- › applies appropriate methods of food processing, preparation and storage FT5-5
- › describes the relationship between food consumption, the nutritional value of foods and the health of individuals and communities FT5-6
- › justifies food choices by analysing the factors that influence eating habits FT5-7
- › collects, evaluates and applies information from a variety of sources FT5-8
- › communicates ideas and information using a range of media and appropriate terminology FT5-9
- › selects and employs appropriate techniques and equipment for a variety of food-specific purposes FT5-10
- › plans, prepares, presents and evaluates food solutions for specific purposes FT5-11
- › examines the relationship between food, technology and society FT5-12
- › evaluates the impact of activities related to food on the individual, society and the environment FT5-13

Food Technology - Year 9 - Scope and Sequence

The following scope and sequence covers the following content:

- Food in Australia, Food Selection and Health, Food Product Development, Food Service and Catering

T e r m 1	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7	Week 8	Week 9	Week 10
	Food In Australia: History of food in Australia, including bush tucker. Variety of cultures. Develop knowledge of cultural protocols associated with food and its preparation.

Food Technology - Year 10 - Assessment Schedule

Course Overview:

By the end of Stage 5, students are able to make informed decisions based on knowledge and understanding of the impact of food on society, of food properties, preparation and processing, and the interrelationship of nutrition and health. This understanding enables them to design, manage and implement solutions, in a safe and hygienic manner, for specific purposes with regard to food. Students select, use and apply appropriate terminology, resources and a broad range of media to accurately communicate ideas, understanding and skills to a variety of audiences. Students demonstrate practical skills in preparing and presenting food that enable them to select and use appropriate ingredients, methods and equipment. Students apply skills and gain confidence in managing, realising and evaluating solutions for specific food purposes.

History and Geography - Year 9 - Assessment Schedule

Course Overview:

History:

The Year 9 course provides a study of the history of the making of the modern world from 1750 to 1945. It was a period of industrialisation and rapid change in the ways people lived, worked and thought. It was an era of nationalism and imperialism, and the colonisation of Australia was part of the expansion of European power. The period culminated in World War I (1914–1918) and World War II (1939–1945).

Geography

Students in Year 9 Geography examine the physical characteristics and productivity of biomes. Students analyse the impact humans have on biomes in an effort to produce food and increase agricultural yields. They examine population trends and projections from Australia and across the world and forecast future food supply-and-demand issues. Then, students examine the patterns and trends in population movements and the increasing urbanisation of countries. They discuss the reasons for internal and international migration patterns and the consequences of population movements, including the increased concentration of populations within countries.

HT5-1 explains and assesses the historical forces and factors that shaped the modern world and Australia

HT5-2 sequences and explains the significant patterns of continuity and change in the development of the modern world and Australia

HT5-3 explains and analyses the motives and actions of past individuals and groups in the historical contexts that shaped the modern world and Australia

HT5-4 explains and analyses the causes and effects of events and developments in the modern world and Australia

HT5-5 identifies and evaluates the usefulness of sources in the historical inquiry process

HT5-6 uses relevant evidence from sources to support historical narratives, explanations and analyses of the modern world and Australia

HT5-7 explains different contexts, perspectives and interpretations of the modern world and Australia

HT5-8 selects and analyses a range of historical sources to locate information relevant to an historical inquiry

HT5-9 applies a range of relevant historical terms and concepts when communicating an understanding of the past

HT5-10 selects and uses appropriate oral, written, visual and digital forms to communicate effectively about the past for different audiences

Geography Syllabus Outcomes:

GE5-1 explains the diverse features and characteristics of a range of places and environments

GE5-2 explains processes and influences that form and transform places and environments

GE5-3 analyses the effect of interactions and connections between people, places and environments

GE5-4 accounts for perspectives of people and organisations on a range of geographical issues

GE5-5 assesses management strategies for places and environments for their sustainability

GE5-6 analyses differences in human wellbeing and ways to improve human wellbeing

GE5-7 acquires and processes geographical information by selecting and using appropriate and relevant geographical tools for inquiry

GE5-8 communicates geographical information to a range of audiences using a variety of strategies

History and Geography - Year 10 - Assessment Schedule

Course Overview:

History:

The year 10 course examines the history of the modern world and Australia from 1945 to the present, with an emphasis on Australia in its global context. The twentieth century became a critical period in Australia's social, cultural, economic and political development. The transformation of the modern world during a time of political turmoil, global conflict and international cooperation provides a necessary context for understanding Australia's development, its place within the Asia-Pacific region, and its global standing.

Geography

The year 10 course examines the patterns and trends in population movements and the increasing urbanisation of countries. Students explore strategies to create liveable and sustainable urban places, propose solutions and suggest opportunities for active citizenship. The students study the nature of, and differences in, human wellbeing and development that exist within and between countries. Students investigate examples from Australia and across the world of issues affecting development, the impact on human wellbeing and the consequences of spatial variations across scales.

Industrial Technology Construction Assessment Schedule

Course Overview:
 The study of Industrial Technology provides students with opportunities to engage in a diverse range of creative and practical experiences using a variety of technologies widely available in industrial and domestic settings. Industrial Technology develops knowledge and understanding of materials and processes. Related knowledge and skills are developed through a specialised approach to the tools, materials and techniques employed in the planning, development, construction and evaluation of quality practical projects and processes. Critical thinking skills are developed through engagement with creative practical problem-solving activities. The study of Industrial Technology develops in students an understanding of related work environments and Work Health and Safety (WHS) matters, while developing a range of skills that equip them for future learning, potential vocational pathways and leisure and lifestyle activities involving technologies. The knowledge, understanding, skills and attitudes developed through the study of Industrial Technology provides opportunities for students to make positive contributions to Australian industry and society, to express valued opinions and to make considered judgements as contributing members of society

The study of Industrial Technology provides students with opportunities to engage in a diverse range of creative and practical experiences using a variety of technologies widely available in industrial and domestic settings. Industrial Technology develops knowledge and understanding of materials and processes. Related knowledge and skills are developed through a specialised approach to the tools, materials and techniques employed in the planning, development, construction and evaluation of quality practical projects and processes. Critical thinking skills are developed through engagement with creative practical problem-solving activities. The study of Industrial Technology develops in students an understanding of related work environments and Work Health and Safety (WHS) matters, while developing a range of skills that equip them for future learning, potential vocational pathways and leisure and lifestyle activities involving technologies. The knowledge, understanding, skills and attitudes developed through the study of Industrial Technology provides opportunities for students to make positive contributions to Australian industry and society, to express valued opinions and to make considered judgements as contributing members of society

Assessment Syllabus Outcomes

IND5-1 identifies, assesses, applies and manages the risks and WHS issues associated with the use of a range of tools, equipment, materials, processes and technologies.

IND5-2 applies design principles in the modification, development and production of projects

IND5-3 identifies, selects and uses a range of hand and machine tools, equipment and processes to produce quality practical projects

IND5-4 selects, justifies and uses a range of relevant and associated materials for specific applications

IND5-5 selects, interprets and applies a range of suitable communication techniques in the development, planning, production and presentation of ideas and projects

IND5-6 identifies and participates in collaborative work practices in the learning environment

IND5-7 applies and transfers skills, processes and materials to a variety of contexts and projects

IND5-8 evaluates products in terms of functional, economic, aesthetic and environmental qualities and quality of construction

IND5-9 describes, analyses and uses a range of current, new and emerging technologies and their various applications

IND5-10 describes, analyses and evaluates the impact of technology on society, the environment and cultural issues locally and globally

International Studies Assessment Schedule

Course Overview:

The study of International Studies provides a unique conceptual framework for the study of culture, and the promotion of intercultural understanding. The course provides students with the opportunity to explore and recognise their own cultures, and appreciate the richness of multicultural Australia and the world. International Studies equips students with intercultural sensitivities and the critical skills of analysis and intercultural understanding to participate in, and contribute to building a cohesive and just world.

Assessment Syllabus Outcomes

1. analyses a variety of definitions of culture
2. describes characteristics of culture
3. examines cultural similarities and differences
4. examines cultural diversity
5. accounts for the dynamic nature of culture
6. identifies influences on cultures and their interconnectedness
7. recognises bias and stereotypes
8. analyses different contexts, perspectives and interpretations of cultural beliefs and practices
9. evaluates culturally significant issues, events and scenarios from a variety of perspectives
10. applies understanding of cultural differences when communicating across cultures
11. applies strategies to challenge stereotypes
12. selects and uses a range of written, visual and oral forms, to describe, analyse and communicate about cultures

International Studies Scope and Sequence

The following scope and sequence covers the following content:

- Core: Understanding Culture and Diversity in Today's World. (50 hours)

Japanese Assessment Schedule

Course Overview:

Through learning languages, students develop an intercultural capability and an understanding of the role of language and culture in communication, and become more accepting of difference and diversity. They develop understanding of global citizenship, and reflect on their own heritage, values, culture and identity.

Assessment Syllabus Outcomes;

- LJA5-1C** manipulates Japanese in sustained interactions to exchange information, ideas and opinions, and make plans and negotiate
- LJA5-2C** identifies and interprets information in a range of texts
- LJA5-3C** evaluates and responds to information, opinions and ideas in texts, using a range of formats for specific contexts, purposes and audiences
- LJA5-4C** experiments with linguistic patterns and structures to compose texts in Japanese, using a range of formats for a variety of contexts, purposes and audiences
- LJA5-5U** demonstrates how Japanese pronunciation and intonation are used to convey meaning
- LJA5-6U** demonstrates understanding of how Japanese writing conventions are used to convey meaning
- LJA5-7U** analyses the function of complex Japanese grammatical structures to extend meaning'
- LJA5-8U** analyses linguistic, structural and cultural features in a range of texts
- LJA5-9U** explains and reflects on the interrelationship between language, culture and identity

Assessment Syllabus Outcome

MAR5-1 Identifies and describes a range of marine and aquatic ecosystems and investigates their complex interrelationships.

MAR5-2 Identifies, describes and evaluates the social and economic importance of marine ecosystems.

MAR5-3 Identifies, describes and evaluates the effects humans have had on the marine environment.

MAR5-7 Identifies, describes and evaluates the ethical, social and sustainability issues related to the marine environment.

MAR5-9 Selects and uses a broad range of contemporary materials, equipment and techniques with confidence in aquaculture and marine settings.

MAR5-10 Demonstrates safe and responsible use of a range of materials, equipment and techniques in different aquaculture, marine and maritime situations.

MAR5-13 Collects and organises data by experimenting and accurately reading instruments, signals and charts and communicates this information.

MAR5-14 Recalls aspects of the marine environment using relevant conventions, terminology and symbols.

Marine Studies Scope and Sequence

Mathematics 5.3 Assessment Schedule

Course Overview:					
The study of Mathematics provides opportunities for students to appreciate the elegance and power of mathematical reasoning and to apply mathematical understanding creatively and efficiently. The study of the subject enables students to develop a positive self-concept as learners of Mathematics, obtain enjoyment from mathematics, and become self-motivated learners through inquiry and active participation in challenging and engaging experiences.

Assessment Syllabus Outcomes

MA5.1-4NA solves financial problems involving earning, spending and investing money
 MA5.1-5NA operates with algebraic expressions involving positive-integer and zero indices, and establishes the meaning of negative indices for numerical bases
 MA5.1-6NA determines the midpoint, gradient and length of an interval, and graphs linear relationships
 MA5.2-4NA solves financial problems involving compound interest
 MA5.2-7NA applies index laws to operate with algebraic expressions involving integer indices
 MA5.2-9NA uses the gradient-intercept form to interpret and graph linear relationships
 MA5.3-6NA performs operations with surds and indices
 MA5.3-8NA uses formulas to find midpoint, gradient and distance on the Cartesian plane, and applies standard forms of the equation of a straight line
 MA5.3-10NA recognises, describes and sketches polynomials, and applies the factor and remainder theorems to solve problems
 MA5.3-11NA uses the definition of a logarithm to establish and apply the laws of logarithms
 MA5.1-9MG interprets very small and very large units of measurement, uses scientific notation, and rounds to significant figures
 MA5.1-10MG applies trigonometry, given diagrams, to solve problems, including problems involving angles of elevation and depression
 MA5.1-11MG describes and applies the properties of similar figures and scale drawings
 MA5.2-11MG calculates the surface areas of right prisms, cylinders and related composite solids
 MA5.2-12MG applies formulas to calculate the volumes of composite solids composed of right prisms and cylinders
 MA5.2-13MG applies trigonometry to solve problems, including problems involving bearings
 MA5.2-14MG calculates the angle sum of any polygon and uses minimum conditions to prove triangles are congruent or similar
 MA5.3-13MG applies formulas to find the surface area of right pyramids, right cones, spheres and related

Mathematics 5.3 Scope and Sequence

The following scope and sequence covers the following content:

- Number and Algebra – 60 hours
- Measurement and Geometry – 70 hours

Music Assessment Schedule

Course Overview:

The aim of the *Music Years 7–10 Syllabus* is to provide students with the opportunity to acquire the knowledge, understanding and skills necessary for active engagement and enjoyment in performing, composing and listening, and to allow a range of music to have a continuing role in their lives.

Component	Task 1	Task 2	Task 3	Task 4	Weighting %

Composition			20		20
Total %	25	15	20	40	100

Assessment Syllabus Outcomes:

- 5.1** Performs repertoire with increasing levels of complexity in a range of musical styles demonstrating an understanding of the musical concepts
- 5.2** Performs repertoire in a range of styles and genres demonstrating interpretation of musical notation and the application of different types of technology
- 5.3** Performs music selected for study with appropriate stylistic features demonstrating solo and ensemble awareness
- 5.4** Demonstrates an understanding of the musical concepts through improvising, arranging and composing in the styles or genres of music selected for study
- 5.5** Notates own compositions, applying forms of notation appropriate to the music selected for study
- 5.6** Uses different forms of technology in the composition process
- 5.7** Demonstrates an understanding of musical concepts through the analysis, comparison, and critical discussion of music from different stylistic, social, cultural and historical contexts
- 5.8** Demonstrates an understanding of musical concepts through aural identification, discrimination, memorisation and notation in the music selected for study
- 5.9** Demonstrates an understanding of musical literacy through the appropriate application of notation, terminology, and the interpretation and analysis of scores used in the music selected for study
- 5.10** Demonstrates an understanding of the influence and impact of technology on music

PASS5-1 discusses factors that limit and enhance the capacity to move and perform

PASS5-2 analyses the benefits of participation and performance in physical activity and sport

PASS5-3 discusses the nature and impact of historical and contemporary issues in physical activity and sport

PASS5-4 analyses physical activity and sport from personal, social and cultural perspectives

PASS5-5 demonstrates actions and strategies that contribute to active participation and skilful performance

PASS5-6 evaluates the characteristics and quality performance in physical activity and sport

PASS5-7 works collaboratively with others to enhance participation, enjoyment and enjoyment

PASS5-8 displays management and planning skills to achieve personal and group goals

PASS5-9 performs movement skills with increasing proficiency

PASS5-10 analyses and appraises information, opinions and observations to inform physical activity and sport decisions

Physical Activity and Sports Studies (PASS) Scope and Sequence

The following scope and sequence covers the following content:

- Foundations of physical activity
- Physical activity and sport in society
- Enhancing participation and performance.

Assessment Syllabus Outcomes

PD5-1 assesses their own and others' capacity to reflect on and respond positively to challenges

PD5-2 researches and appraises the effectiveness of health information and support services available in the community

PD5-3 analyses factors and strategies that enhance inclusivity, equality and respectful relationships

PD5-4 adapts and improvises movement skills to perform creative movement across a range of dynamic physical activity contexts

PD5-5 appraises and justifies choices of actions when solving complex movement challenges

PD5-6 critiques contextual factors, attitudes and behaviours to effectively promote health, safety, wellbeing and participation in physical activity

PD5-7 plans, implements and critiques strategies to promote health, safety, wellbeing and participation in physical activity in their communities

PD5-8 designs, implements and evaluates personalised plans to enhance health and participation in a lifetime of physical activity

PD5-9 assesses and applies self-management skills to effectively manage complex situations

PD5-10 critiques their ability to enact interpersonal skills to build and maintain respectful and inclusive relationships in a variety of groups or contexts

PD5-11 refines and applies movement skills and concepts to compose and perform innovative movement sequences

PDHPE Scope and Sequence

The following scope and sequence covers the following content:

Students evaluate a broad range of factors that shape identity and have an impact on young people's health decisions, behaviours and actions. They plan and evaluate strategies and interventions and advocate for their own and others' health, safety and wellbeing. Students investigate the impact of changes and transitions on relationships. They assess their capacity to consider and respond positively to challenges and how they can contribute to caring, inclusive and respectful relationships. Students reflect on emotional responses in a variety of situations and demonstrate protective skills to promote health, safety and wellbeing and manage complex situations. They design and implement actions to enhance and support their own and others' fitness levels and participation in a lifetime of physical activity.

Students use movement to satisfy personal needs and interests. They participate in movement experiences with persistence as they compose, perform and appraise movement in various contexts. Students refine and apply movement skills and movement concepts to compose and perform innovative sequences. In response to unpredictable situations they work alone and collaboratively to design and apply creative solutions to movement challenges. Students apply and transfer movement concepts, skills, strategies and tactics to new and challenging situations. They use criteria to make judgements about and refine their own and others' specialised movement skills and performances. Students describe the impact of biomechanical factors on skill development and performance. Students demonstrate leadership, fair play and cooperation across a range of movement contexts. They adopt a variety of roles such as a leader, mentor, official, coach and team member to support and encourage the involvement of others.

Table of Assessment Syllabus Outcomes

- 5.1** develops range and autonomy in selecting and applying photographic and digital conventions and procedures to make photographic and digital works
- 5.2** makes photographic and digital works informed by their understanding of the function of and relationships between artist–artwork–world–audience
- 5.3** makes photographic and digital works informed by an understanding of how the frames affect meaning
- 5.4** investigates the world as a source of ideas, concepts and subject matter for photographic and digital works
- 5.5** makes informed choices to develop and extend concepts and different meanings in their photographic and digital works
- 5.6** selects appropriate procedures and techniques to make and refine photographic and digital works
- 5.7** applies their understanding of aspects of practice to critically and historically interpret photographic and digital works
- 5.8** uses their understanding of the function of and relationships between the artist–artwork–world–audience in critical and historical interpretations of photographic and digital works
- 5.9** uses the frames to make different interpretations of photographic and digital works
- 5.10** constructs different critical and historical accounts of photographic and digital works

Assessment Syllabus Outcome

SC5-7WS processes, analyses and evaluates data from first-hand investigations and secondary sources to develop evidence-based arguments and conclusions

SC5-8WS applies scientific understanding and critical thinking skills to suggest possible solutions to identified problems

SC5-9WS presents science ideas and evidence for a particular purpose and to a specific audience, using appropriate scientific language, conventions and representations

SC5-10PW applies models, theories and laws to explain situations involving energy, force and motion

SC5-11PW explains how scientific understanding about energy conservation, transfers and transformations is applied in systems

SC5-12ES describes changing ideas about the structure of the Earth and the universe to illustrate how models, theories and laws are refined over time by the scientific community

SC5-14LW analyses interactions between components and processes within biological systems

SC5-16CW explains how models, theories and laws about matter have been refined as new scientific evidence becomes available

Science Scope and Sequence
